SEAMLESS TIMBERPRO 735D TFB UPGRADE

TIMBERPRO

TIMBERPRO TF 830D BRINGS **High-Performance Versatility to the Ohio Market**

The TimberPro TF 830D and 840D are two of the most versatile wheeled machines in the world today. The TimberPro line of machines come standard with large swing bearings and 360-degree, continuous rotation allowing the operator to always face their work. This feature also gives the operator the ability to remove timber from 360 degrees around the machine, including the option to work over the front of the machine just as well as the sides and rear.

"TimberPro's TF 830D and 840D are incredibly versatile machines, well suited to a wide variety of applications," said Jesse Garber, general sales manager for Columbus Equipment Company's Material Processing Division. "As TimberPro's reputation for well-engineered equipment expands, it is interesting to see new applications develop over time," added Garber.

TimberPro equipment has long been proven effective in forwarding logs in the forest, as well as many other logging applications. It can be used to move logs in mill yards, set mats in the pipeline industry, and most importantly as combo machines equipped with a quick-detach booms, allowing conversion from a forwarder to a harvester in just 10 minutes.

The 830's 338-horsepower, Tier 4F/Stage 5-compliant Cummins L9 engine—with a simple Single Module DOC/DPF/SCR unit—packs a punch, delivering 1,125 lb-ft

of torque with improved fuel economy and faster cycle times.

With the option of a custom grapple for loading and transporting rig mats, the TimberPro 830D and 840D are the only machines on the market with full 360-degree, continuous rotation, allowing the operator to load, haul and set mats without driving off the matted surface. They are also fitted with a special dump body for removing jobsite debris and biomass.

TimberPro's short wheelbase and a 20- or 22-ton Bogie Axle is configured to allow front and rear axles to track perfectly evenly in the tightest turns (inside diameter 39 feet). Bunks are also adjustable from 8' 2" inside dimension to 9' 10".

Operator-friendly features such as access to major components as well as an isolated electrical compartment make servicing a breeze. A 100-gallon fuel tank, high-powered LED lighting package and a large, comfortable ROPS/OPS/FOPS-certified cab with heated, air-ride seat and reduced noise levels all serve to boost productivity.

Call your local Material Processing Division representative and schedule a demonstration of the TimberPro TF 830D today! Built for impressive and comfortable performance, the 830D won't disappoint.

NEW CBI® 5900T HORIZONTAL GRINDER: Impressive Engineering Dominates Any Material

CBI® recently introduced the all-new CBI 5900T, a next-generation horizontal grinder designed to set new standards in efficiency, power, and durability. As the first model in the 5900 series, this machine blends the best of both worlds—incorporating proven features from the trusted CBI 6800 and 5800 grinders while introducing innovative upgrades for superior material processing.

With a 60-inch-wide infeed rotor, the 5900T optimizes material flow, effortlessly handling wider material and reducing the need for pre-processing. A robust, 755-horsepower, CAT Tier 4 Final engine, paired with a hydraulic clutch, delivers smooth, powerful performance with precise control, making it an exceptional choice for high-production applications.

Designed with mobility and transport efficiency in mind, the 5900T boasts an 8' 6" legal transport width and a redesigned dolly system, ensuring seamless movement between job sites. Built for durability and ease of maintenance, this next-generation grinder features quick air filter removal and convenient engine access, minimizing downtime and maximizing productivity.

A key enhancement to the 5900T is an updated discharge system, engineered with multiple wear plates and a material-ejecting pulley to enhance durability and overall performance. Additional key features include:

- **Metal Detection System (MDS):** Provides essential protection from tramp metal, preventing damage to vital components.
- **Belt hold down rollers:** Extend skirt rubber life for increased efficiency and longevity.

"The 5900T represents CBI's commitment to continuous innovation in the grinding industry," said Jesse Garber, general sales manager, Columbus Equipment Company. "By integrating the most effective elements of their flagship models and introducing new features, they've created a machine that delivers power, efficiency, and reliability."

CBI customers will not be surprised to hear the 5900T is built to tackle the toughest grinding applications with ease, offering industry-leading performance and durability. Contact Scott Parsons, Kort Dwyer or Jesse Garber today and schedule a time to see the impressive, next-gen CBI 5900T in action!

TIMBERPRO

COMPLETE CLEARING INC.

Enjoys Seamless TimberPro 735D TFB Upgrade

Complete Clearing's TimberPro 735D at work in Portland, Ohio. The U.S. 33 widening project covers 13 miles of the artery, is 350 to 700 feet wide, and encompasses 168 acres of clearing over 314 acres of total disturbance.

When your entire day is spent in a piece of machinery, every upgrade makes a difference. Complete Clearing Inc. recently acquired two new TimberPro 735D tracked feller bunchers to replace the aging Komatsu Forest 430 feller bunchers they've owned for about 6 years, and Operator/Foreman Brock Dixon is enjoying the creature comforts the new machines provide.

"The 735D has more horsepower and a higher-performing hydraulic system, so it packs a punch above its weight class."

Jesse Garber, General Sales Manager
Columbus Equipment Company

"The cab is more spacious for the operator, and that's a huge plus," he said. It also offers "a little bit of luxury," including a standard digital climate control system that keeps the cabin's temperature comfortable no matter the weather. The cab also features Bluetooth, radio and a heated seat. "The seats and the cab interior are the best out there," Dixon

said. The cabin also has an operator-friendly, fully customizable IQAN MD4 touch-screen control system.

Comfortable work environment aside, Dixon also appreciates the performance of the TimberPro, which Marengo, Ohio-based Complete Clearing decided to purchase because the Komatsu Forest 430 units are no longer available. "We really like what we're doing with the 735," he said.

"The 735D has taken the place of the Komatsu Forest 430 in that weight class. The cool thing is that it has more horsepower and a higher-performing hydraulic system, so it packs a punch above its weight class," noted Jesse Garber, general sales manager for the Material Processing Division of Columbus Equipment Company.

The 735D features a new single-module aftertreatment system that meets Tier 4 Final requirements while increasing horsepower and torque ratings. The TimberPro's 338-hp Cummins L9 engine offers 1,125 lb.-foot of torque while providing better fuel economy and faster cycle times than previous models.

Complete Clearing does a lot of work for heavy highway construction and recently cleared banks and slopes along I-270 and U.S. 23 in Columbus for new lanes and bridges, in addition to a U.S. 33 widening project in Southeastern Ohio. The company, which was started in 1995 and has about 30 employees, also

In addition to the machine's strong performance, Complete Clearing's Brock Dixon considers the 735D's cab environment "the best out there."

does clearing for large-scale subdivisions.

Several features on the TimberPro 735D increase productivity and safety on the job. "I find the 735D is stronger handling trees, and I like that about it," Dixon said. The 735D has a lift capacity of 12,800 pounds.

The rear camera system is one of Dixon's favorite features on the feller buncher. "We didn't have those in the old machine, but it's really helpful. When you're working on a large slope and you cut a tree, you can't turn around. It's nice to be able to see where the stumps are [thanks to the camera] so you don't run over them."

"Performing routine maintenance is also hassle-free because the entire back of the machine opens to provide 100% exposure to the engine."

Brock Dixon; Operator/Foreman, Complete Clearing Inc.

The large window in the cabin gives the operator better visibility out the front and on the boom side, "which makes it easier to do the job and makes it safer," he noted. He estimates there's another foot or two of visibility because of the larger window. The machine also has high output LED lighting that increases night visibility in the work area and directly under the cab to illuminate the tracks.

"Performing routine maintenance is also hassle-free because the entire back of the machine opens to provide 100% exposure to the engine, so it's easy for someone doing maintenance," Dixon said of the gullwing-style rear door.

In fact, the 735D is designed for ease of

maintenance, long life, and low ownership costs. For example, a panel behind the operator's cab provides access to all the electrical components laid out on a board "so you get really easy access to anything electrical. It's not buried or behind anything," Garber said. TimberPro also made it easy to access the hydraulic components, control valve, swing motor, and components such as the starter, alternator and filters.

The machine also has an improved boom debris deflection system to shed forest debris before it reaches internal compartments.

Complete Clearing has been a customer of Columbus Equipment Company since its founding, Dixon said. "Columbus Equipment has very good field service technicians, including Caleb Pitz and Jason Woods, the two guys we usually deal with, and Garrett Bailey running the show. It's easy to work with these guys. They know what they're doing and are very good with us all the way around."

In addition to the TimberPros, Complete Clearing runs a variety of equipment from Columbus Equipment Company, including Komatsu excavators, CMI mulcher and stump grinder, and several feller bunchers. Dixon estimates "we've purchased 30 to 40 pieces from Columbus Equipment, if not more. We deal with Columbus Equipment Company on a daily basis. It's a good company, and they are good people to work with." 

NEW AND PREVIOUSLY-OWNED, LATE-MODEL EQUIPMENT FOR SALE AND RENT

2021 Rayco C200R Track Mulcher

S/N: CR200R0100, 783 Hrs., Isuzu Engine (188HP), 66 GPM Hydraulic Flow to the Mulcher, HD Rubber Track Undercarriage, 2-Speed Ground Travel, Hydraulic Rear Winch

\$195,000

2023 CBI Magnum Force 5800BT Horiz. Grinder

S/N: O22100, 1,972 Hrs., CAT C18 Tier 4F Diesel Engine (765HP), Auto Reversing Fan System, 48" Wide x 40" Diameter Hammermill, Forged Drum Offset Helix Rotor, 6" Rotor Shaft

\$789,000

2023 CBI Magnum Force 6800CT Horiz. Grinder

S/N: O11282, 898 Hrs., CAT C27 Tier 4F Diesel Engine (1,050HP), PT Tech HPT015 Hyd. Clutch, Auto Reversing Fan System, 40" x 60" Hammermill (24 Hammer Pattern), Forged Drum Offset Helix Rotor

\$870,000

2018 CMI C450 Track Mulcher

S/N: GBC08813, 2,662 Hrs., CAT Engine, Pre Emissions, FAE 300U-250

\$375,000

2019 CMI C475 Track Mulcher

S/N: CA400302, 1,972 Hrs., CAT Tier 4F C-13 (475HP), 4 Pump Hydraulic System, Attachment One Piston Pump, Track Two Piston Pumps, Auxiliary Function One Gear Pump

\$360,000

2016 Komatsu 865 Forwarder

S/N: 1657, 895 Hrs., Komatsu 865 Forwarder Base, Crane, CRF 11, 25'7" Loading Reach, Grapple, Komatsu G36 HD Grapple, 8 Wheel Arrangement, Bogie Front Axle, Bogie Axle Rear Frame

\$289,000

2023 CBI Magnum Force 6800CT Horiz. Grinder

S/N: O11304, 785 Hrs., CAT C27 (1,050HP), Mag Head Pulley

\$900,000

2022 Terex Ecotec TTS620T Screen Aggregate

S/N: TRXTS620KCMNB9898, 222 Hrs.,

\$349,000

2023 Terex Ecotec Phoenix 2100

S/N: TRX00176ECMP41531, 2 Hrs., CAT C4.4 Tier 4 Final (173HP), 134 Gal. Fuel Tank, 157 Gal. Hydraulic Tank, 21'2" long by 6'4" Dia. Drum, Friction Four Wheel Drum Drive System, Variable Speed Control

\$349,000

2024 MGL 842XR Conveyor/Feeder/Stacker

S/N: 842XR163, 16 Hrs., Cummins 74HP, Fixed Brake Tandem Road Axles, Hydraulic Fold Down Radial Wheels, Dual Drive Wheels, HD Hydraulic Transport Jack, Chevron Belt, Pivot Plate

\$129,000

2024 MGL 842T Conveyor/Feeder/Stacker

S/N: 842T369, Cummins 74HP, Oversized Crawler Tracks, Wireless Remote, Oversize Radial Hopper, Plain Vulcanized 3 Ply Belt

\$123,900

2024 Terex Ecotec Phoenix 1600

S/N: TRXPI600KCMR24889, 6 Hrs., CAT C4.4 Tier4F Diesel Engine (110HP), 5' x 16' Screen, 3.3 Cu. Yd. Hopper Capacity, Radial Conveyor w/180 Degree Swing and Variable Discharge Height
