CBI 5800BT EXCELLENT FIT
FOR OPERATION IN GROWTH MODE

NEW AND PREVIOUSLY-OWNED, LATE-MODEL EQUIPMENT FOR SALE AND RENT

**2023 Finlay 883
Screen Aggregate**

S/N: TRX883M4TDGPA3345, 965 Hrs, Deutz TCD 3.6L Tier 4F (123HP), Feeder: Abrasion Resistant Plate Steel Pan Apron Feeder, Heavy Duty Chain Drive Fixed Hopper, Remote Start Stop of Pan Feeder

\$300,000

**2021 Rayco C200R
Track Mulcher**

S/N: CR200R0100, 783 Hrs., Isuzu Engine (188HP), 66 GPM Hydraulic Flow to the Mulcher, HD Rubber Track Undercarriage, 2-Speed Ground Travel, Hydraulic Rear Winch

\$165,000

**2024 Eggersmann
Star Select S60 Scrap
Processing / Demolition**

S/N: 50430025, 300 Hrs., Used

\$460,000

**2025 Finlay I-100RS
Crusher Aggregate**

1,101 Hrs., CAT C7.1 (275HP), Terex CR004 Impact Chamber, Full Hydraulic Apron Setting, 4 Bar Rotor - 2 Bars High & 2 Low, Direct Drive Via Clutch, Fixed Hopper W/Vibrating Feeder

\$580,000

**2023 Finlay I-120RS
Crusher Aggregate**

S/N: TRX120RSTOMP51890, 840 Hrs, Scania DC9 (350HP), Terext CR038 Impact Chamber, Fully Hydraulically Assisted Apron, Setting and Hydraulic Apron Release Manual Raise Inlet Flap

\$730,000

**2019 Komatsu XT465L-5
Track Feller Bunchers**

S/N: A900914, 4,596 Hrs., Full Service, Work Ready, Quadco 27B

\$350,000

**2023 Terex Ecotec
Phoenix 2100**

S/N: TRX00176ECMP41531, 2 Hrs., CAT C4.4 Tier 4 Final (173HP), 134 Gal. Fuel Tank, 157 Gal. Hydraulic Tank, 21'2" long by 6'4" Dia. Drum, Friction Four Wheel Drum Drive System, Variable Speed Control

\$349,000

**2019 KPI-JCI FT2650
Crusher Aggregate**

S/N: 418595, 1,908 Hrs., CAT C9.3, Tier IV 1,800 RPM (300HP), Radio Remote and Tether, 2650 Pioneer Jaw Crusher, Hyd. Dual Wedge Adjust CSS, Hyd. Drive For Crusher

\$558,349

**2023 KPI-JCI GT4400C
Crusher Aggregate**

S/N: 420387, 701 Hrs., Cummins QSL9 Tier IV 1,800 RPM (380HP), Radio Remote And Tether, 4240 Horizontal Shaft w/HD Solid Rotor, Variable Speed Hyd. Crusher Drive

\$550,000

**2012 Morbark 3800XL
Horizontal Grinders**

S/N: 191-1023, 8,200 Hrs., Used

\$250,000

**2025 Terex Ecotec Phoenix
2100T Screen Aggregate**

S/N: TRX2100THCMR14035, 7 Hrs., CAT C4.4 Tier 4 Final (173HP), 11.11 Cubic Yard Hopper, Rear/Side Extension, 47" Feed Conveyor, 3 Ply, Variable Speed Control, 47.2" Collection Conveyor, 3 Ply

\$419,000

**2025 Terex Ecotec TDS815
Scrap Processing /
Demolition**

S/N: TRXE017KCMS48469, 16 Hrs., Dual Shaft - Slow Speed, Green Waste Shafts, Concrete Shafts, Small Demo Volume Reduction

TIMBERPRO

TIMBERPRO 735/745/755 D SERIES FELLER BUNCHERS: DESIGNED BY LOGGERS

TimberPro's reputation for manufacturing industry-leading, purpose-built forestry machines and attachments is founded in the brand's build integrity and industry-specific features that make them a smart choice for timber harvesting and land clearing.

"TimberPros are rugged and have a simple design that makes serviceability easy," said Jesse Garber, general sales manager for the Material Processing Division. "The qualities that have helped TimberPro develop a very loyal customer base and are well reflected in the D Series feller buncher line."

"The qualities that have helped TimberPro develop a very loyal customer base and are well reflected in the D Series feller buncher line."

Jesse Garber, General Sales Manager
Columbus Equipment Company

The D Series' powerful 350 HP, Cummins-L9-Series-engine performance is designed for high-production felling in Ohio's demanding forestry application. TimberPro 735/745/755 Feller Bunchers are capable of lifting over 9,000 lbs. at 24 feet.

Rugged, simple design features including advanced leveling systems—allowing for front tilt of 28 degrees, rear tilt of 7 degrees, and side tilt of 24 degrees—excellent multi-functioning capabilities, closed-loop hydraulics, a durable undercarriage, and customizable options result in a machine punching well above its weight class.

"The TimberPro D Series' work zone visibility is unique to the industry," added Garber. Critical right-hand, line-of-sight is superior to competitive brands—many of whom use cameras to achieve the same degree of visual access. Accompanying clear-line visibility in all directions, including peripheral and above the machine, allows the operator to safely and confidently process trees anywhere around machine, with direct vision of the canopy top and landing zone. "The TimberPro D Series' configuration prioritizes safety by design," said Garber.

"Agility in the woods is also excellent and the D Series' horsepower and hydraulic capability is high for the weight class," added Garber. "That makes TimberPro feller bunchers an excellent fit for the Ohio market," Garber noted. "Getting into a TimberPro feller buncher at its weight class can really help a contractor who has had trouble meeting Ohio's tough weight restrictions with other machines."

Call Mark DiSalvo at (937) 424-7678 today and schedule a demo of Ohio's most productive, timber-processing workhorses!

COLUMBUS EQUIPMENT COMPANY

CENTRAL TREE: **CBI 5800BT Excellent Fit for Operation in Growth Mode**

Matt D'Amico has always been fascinated by construction equipment, and after 20 years of owning a tree-clearing company, he's no less enthusiastic about machinery. "When I saw a large development project happening in 2003, I saw the equipment and how cool it was. I just kind of got hooked," recalled Matt, who studied construction management.

Today, Pingree Grove, Illinois-based Central Tree provides professional tree and brush clearing for commercial and residential clients in Northern Illinois and Southern Wisconsin. A typical job is usually up to 10 acres, but the company recently cleared a heavily wooded, 50-acre site with a lot of large trees, for a residential development.

"The CBI has the most aggressive infeed system I've seen by far."

Matt D'Amico; Owner, Central Tree

D'Amico added a landscape mulch business in 2010. He grinds wood from tree-clearing projects and wood that landscapers and other tree services bring to his yard. The end result is nine different types of landscape mulch that he sells to wholesale and retail customers.

Over the years, D'Amico has used a variety of grinders. At first, he had several used grinders "that we had to put a lot of money into" before he started purchasing new equipment. In 2023, he bought a CBI Magnum Force 5800BT portable grinder from Columbus Equipment Company's Material Processing Division to replace a differently-branded machine that had reliability problems.

When choosing the new grinder, D'Amico demoed a couple of brands and was thoroughly impressed by the CBI's infeed system. "When the CBI sucks trees and brush into the system, it is extremely aggressive," he said. "Another brand I demoed had twice the horsepower, so you'd think it would be faster, but no. It wasn't nearly as effective at sucking material into the machine. If you can't get stuff into the machine, it can't grind it, period. The CBI has the most aggressive infeed system I've seen by far."

The size and transportability of the CBI 5800 also appealed to him. When transported, the grinder is only 8 feet 4 inches wide, 12 feet tall, and under 39 feet long. "The 5800 is very nimble and easy to move to different job sites, so we take it to smaller sites. It's also easier to move around the tight streets in the suburbs," said Matt, who works primarily in the Chicago suburbs.

He also chose the 5800 for its sturdy construction. "Having reliable equipment is important to me. We

do a lot of land clearing and construction work, and everyone wants work done yesterday.” D’Amico had problems with grinder reliability in the past and noted that on those machines “the mill box or the hog

“The build on the CBI uses a giant thick piece of steel. There are no bolts to break, nothing is held together by a bunch of small bolts. There are fewer things that can break.”

Matt D’Amico; Owner, Central Tree

box would be pieced together with nuts and bolts.” However, “the build on the CBI uses a giant, thick piece of steel. There are no bolts to break, nothing is held together by a bunch of small bolts. There are fewer things that can break and loosen up or fall apart.”

“Service has been very timely, and I can get parts the next day.”

Matt D’Amico; Owner, Central Tree

Central Tree has operated the CBI for more than a year — using the grinder to break down full trees — with no problems. The grinder can handle trees up to 30 inches in diameter and fills an 80- to 100-yard walking-floor truck in no time. The mulch is transported to the yard, where it goes through a second grinder to

reach the finish size specification.

D’Amico praised Columbus Equipment Company for being “proactive with maintenance and service. If the grinder needed any special service, if there was a service bulletin, Columbus Equipment Company let us know immediately. Service has been very timely, and I can get parts the next day.”

“Since Jesse Garber was in the mulch business, he knows what he’s talking about. His opinions really mean something.”

Matt D’Amico; Owner, Central Tree

The Material Processing sales team has been very responsive to his needs, he said. “Since [General Sales Manager – MP] Jesse Garber was in the mulch business, he knows what he’s talking about. His opinions really mean something. He doesn’t just tell you what you want to hear, which I get a lot of.”

Central Tree has purchased several other items from Columbus Equipment Company, including a Komatsu excavator with a Rotobec grapple saw and a large stump grinder. D’Amico also rents forestry equipment such as the CMI machines from the Material Processing Division.

As a contractor with 20 years of experience running tree clearing equipment and a lifelong fascination with machinery, Matt understands the value of well-engineered equipment and a dealer that stands behind it. He’s found both at Columbus Equipment Company.
